Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by either Silverstein or Meshulam et al. Both references show the claimed wedge blade with a point, a handle and a cover for the blade. Note that both blades have a flat portion that would inherently function as a thumb rest.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meshulam et al. in view of Skerker et al. Meshulam shows all that is claimed except for the scraper blade with a curved portion between two straight portions. Skerker shows a blade used for scraping that has two straight portions and a curved connecting portion. Obviously this would be a useful design to add to the non cutting edge of Meshulam's blade for the purpose of adding a scraping

function that would be useable in several directions and would therefor be obviously added by one of ordinary skill in the art.

Allowable Subject Matter

Claims 2-7, 9, 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-26 are allowed. Claim 15 calls for a snug fitting cap that fits snugly over a rounded blade portion and a storage area inside the handle. These features do not appear to be shown or obviated by the prior art.
